

Job Title: Environmental Instructor/Biologist

Name of Organization: Wrightsville Beach Water Tours and Taxi

Salary: Based on Experience

Job Type: Part-time, opportunity for full time during summer months

Description: Do you have knowledge of the coastal environment and a desire to teach others? Do you have good presentation and people skills? If so, this position may be for you. This is an environmental guide position that will involve working with a diverse client base. This position will require you to learn environmental guide material and guide a wide variety of educational water-based tours, including marine science educational tours for school groups, nature excursions, and shelling trips. The position will also teach you basic bird biology, ecology, and shorebird identification. Experience or documented knowledge (relevant courses, declared major, or degree) of marine/environmental science concepts is preferred. Experience in customer service or public speaking is a plus.

Topics that you will be teaching on guided excursions may include: salt marsh function, inlet formation, dune formation and significance, back dune systems, front dune systems, coastal plant adaptations and identification, mollusk biology, shell identification, and basic fish biology (fins and life stages).

Job Requirements: Must be 18 or older.
Have knowledge and interest in coastal environments
Ability to teach and manage children and seniors
Ability to work outdoors
Ability to speak and communicate effectively
Must be able to pass drug screening
Exceptional customer service skills
Ability to learn and perform basic boat cleaning and handling
