HawkWifi Configuration:

1. Click on the wireless icon in the clock tray, then click on the Properties button.

2. Click on the Wireless Networks tab, select hawkwifi in the Preferred networks section, then click on the Properties button.
3. Click on the Authentication tab. Make sure that “Protected EAP (PEAP) is selected as the EAP type, then click on the Properties button.

4. Check the “Validate server certificate check box, then check the AddTrust External CA Root checkbox in the Authorities section. Then click on the Configure… box.
5. Make sure the When connecting: checkbox is **unchecked**. Then, click OK through all Properties menus.

6. An Enter Credentials dialogue box will pop up asking for your login credentials. Use your UNCW email ID (without the @uncw.edu) for the username, your UNCW password and UNCW as the logon domain. Click OK

You should now be connected to the Hawkwifi network.
