

Connecting your iPhone or iPod Touch to UNCWWEP

Tap the **“Settings”** icon to go to the Settings menu.

Tap the **“Wi-Fi”** option, and then choose **“uncwwep”** under the **“Choose a Network...”**

You will be prompted to enter the WEP key. Enter the network key and then press “Join”. If you don’t know what the network WEP key is, please contact the Technology Assistance Center (TAC) at 962-4357.

Once you press the “Join” button, you should now connect to the “uncwwep” wireless network.

Please contact the TAC if you need further assistance with this.
