Welcome to Year 3 of the GK-12 Program

This year we will be focusing on 6th grade. The science curriculum is very exciting and includes the study of the lithosphere, nutrient cycles, the solar system, energy transformation, and population dynamics. This will be a transition year for the newly adopted science curriculum.

Year 3 Fellows

Department of Earth Sciences:

David Doughty, Lindsey Kraatz & Michael Slattery

Department of Chemistry:

Crisp McDonald & Kelly Taylor
