

Presenting

# DNA Discussion Project

Join Anita Foeman, Ph.D., of the DNA Discussion Project at West Chester University, to discuss the influence that culture and cultural perceptions have on guiding and shaping communicative behaviors. With the use of DNA testing, Foeman explores the construction of race and the perception of ethnicity. Participants may discover they share a rich background that is often unexpected.

## Join us for this event!

**Thursday, February 22, 2018**

*Presented by: Anita Foeman, Ph.D., West Chester University*

1-2:30pm | Warwick Center Ballroom | Open Forum

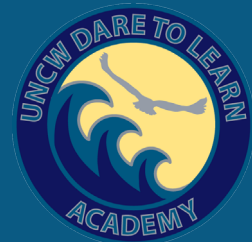

## About the Presenter

Anita Foeman has been a Professor in the Department of Communication Studies at West Chester University since 1982. She received her PhD in Organizational Communication from Temple University. Throughout her career, Dr. Foeman has examined diversity and communication related public speaking and intercultural contexts. Her current work is focused on the social construction of race and identity, examining multiracial families and individuals and exploring the impact of ancestry DNA results on ethnic narratives.
